Declaration that "Judge Andy" Is Back to "Face the Music" Is Disputed-Meets Friends in Albany.

New York, March 8 .- It was learned yesterday morning, on apparently good authority, that the return of "Judge" Andrew Hamilton from Europe was preceded by negotiations between Hamilton and a representative of District Attorney Jerome.

That Hamilton came back because of a desire to protect the memory of his friend, the late John A. McCall, is not believed by those in a position to know the fact. The officers of the New York Life are said to have expressed the opinion privately that the departure of the "judge" from Paris was due entirely to some arrangement with the district attorney,

Hiram R. Steele, a member of the New York Life house cleaning committee, otherwise known as the Fowler comnittee, said yesterday morning that Hamilton's return would mean the speedy bringing of suits for the return or nearly \$1,000,000 spent by the "judge" while he was employed by the New York Life to "watch legislation and taxation." Mr. Steele was in conversation with ex-Justice William A. Keener, ounsel for the committee. It was an nounced that Mr. Keener and John G. It is the government regarding the enforcement specific form of these guarantees that remains unsettled and continues to be the subject for discussions.

Interpellations of the government in regard to various incidents connected with the taking of inventories of the property of Catholic churches, were at followed by violent scenes in the

Chamber of Deputies.

The Nationalist orators represented the government for resorting to violence in taking the inventories, while the Sosinlists maintained that the government had lacked firmness in granting any con-cessions to the Nationalists.

Deputy Lasies created a sensation in the chamber by declaring that the Mo-hammedans in Algeria are treated better than the Catholics in France since the

IRON ORE LIMITED.

World Likey to Run Short Inside of Century.

Washington, March 8 .- The world's supply of iron will be exhausted in 100 years. This is the prophecy, supported by statistics, contained in a report by Consul General Mason at Paris, which has been made public by the departments of commerce and labor. If the present rate of consumption is mainiron ore available. Germany possesses twice as much as the United States, and Russia and France each 400,000,000 tons more. The consumption of the United States is placed at 35,000,000 tons, which is more than a third of the world's total consumption. Consul General Mason's

figures are based largely on the report of the Swedish geological survey. Of the world's workable iron ore de-posits, he said, the United States possesses only about one-ninth. The deposits of the lake districts of America will be exhausted within half a century and the Mesaba deposits will not last 25 years.
